D.O No. M/FYP-46(1)/AWGM/2009-10

Dated 6TH Jan 2010

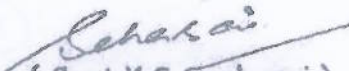

TO WHOMSOEVER IT MAY CONCERN

It is certified that M/s Skywater India Private Ltd., Hyderabad had installed one in number Atmospheric Water Generating Machine together with support infrastructure as a proto-type for exploring suitability of the unit in atmospheric conditions of A & N Islands.

The above machine works on a condensation principle and generates drinking water from the atmospheric air and using relative humidity.

The model piece has been installed in this Directorate and found to be working quite satisfactorily and generating about 1000 Ltrs. of drinking water which is pure and compatible with purified potable water.

The machine would be costing approximately Rs.15,00,000/- and we are in the process of procuring the same.
