To,

Mr. M. Krishna Chaitanya,  
Managing Director,  
Sky Water India Private Ltd.,  
HYDERABAD,  
ANDHRA PRADESH.

Dear Mr. M. Krishna Chaitanya,

We are glad to provide Testimonial for the performance of your Atmospheric Water generating machine installed at our P.R.E. Sub-Division Office in Srinivasapura Taluk as a Pilot Project.

Based on the recent test data collected in terms of water yield and power consumption, we appreciate the validity of this technology as a viable alternative resource for clean drinking water. The machine was making an average of 30 Lts per hour during day and 35 Lts per hour at night with an average power consumption of 8.5 units per hour. This is in line with your unit's performance specifications. The average temperature and relative humidity conditions during the test period were 30°C and 50% RH respectively.

We appreciate your green technology that produces clean drinking water to the common public, where there is no availability of natural water source. Also, we are happy with the performance of the machine and after sales service for the last 4 months.

Best of regards,

  
Assistant Executive Engineer  
P.R.E. Sub-Division  
Srinivasapur,  
Srinivasapura
